EDUCATION

2025–2029	B.Tech — Computer Science & Engineering (AI/ML & IoT) VNR Vignana Jyothi Institute of Engineering & Technology	9.38 CGPA Year 1
2023–2025	Senior Secondary (CBSE) Harvest Jr. College	89%
2022–2023	Secondary (CBSE) Harvest Public School	93.6%

TECHNICAL SKILLS

- **Languages:** C, C++, Python, JavaScript, HTML, SQL
- **Concepts:** Data Structures, Object-Oriented Programming, Frontend Development
- **Tools & Technologies:** GitHub, VS Code, Google Colab, Kaggle, Streamlit, pandas, NumPy, Librosa, Machine Learning

SELECTED PROJECTS

GrainGuard AI — Early-Warning Decision Support

- **Tools:** Python, Random Forest, Librosa, Streamlit, pandas, NumPy.
- Developed an early-warning system for stored-grain monitoring by combining acoustic activity, environmental deviation, and persistence into an explainable risk signal.
- Built an acoustic inference pipeline that extracts audio features and uses a trained Random Forest classifier to estimate acoustic activity.
- Created an interactive Streamlit dashboard displaying risk metrics, waveform and spectrogram visualizations, model output, and risk-component explanations.
- Implemented a weighted risk engine to combine acoustic, environmental, and persistence signals into a final risk level.

Seasonal Agriculture Performance Analysis

- **Tools:** Python, pandas, NumPy, Jupyter/Google Colab, data visualization.
- Analyzed agricultural performance data to identify seasonal patterns and variation across available records.
- Cleaned and explored structured datasets using Python-based data-analysis workflows.
- Performed exploratory analysis to compare trends and relationships within the agricultural data.
- Presented findings through visual and tabular analysis to make patterns easier to interpret.

Car Market Trends Analysis

- **Tools:** Python, pandas, NumPy, Jupyter Notebook, data visualization.
- Performed exploratory analysis on CarDekho vehicle data to examine market patterns and vehicle attributes.
- Prepared and analyzed structured vehicle data using Python data-analysis techniques.
- Investigated relationships among vehicle characteristics and market-related variables.
- Used visual and tabular analysis to communicate observed trends in the dataset.

ACHIEVEMENTS & PARTICIPATION

- **CodeChef rating:** 840
- **Kaggle:** Python certification
- Participated in Vibe Coding Hackathon.
- Participated in ML Challenge (AI WEEK).
- Participated in AI Agents Workshop and Webcraft Workshop at VNRVJIET's CONVERGENCE 2K25.

CERTIFICATIONS & WORKSHOPS

- **Kaggle — Python:** Certificate of Completion, March 8, 2026.
- **AI Agents Workshop:** Certificate of Appreciation, CONVERGENCE 2K25, VNRVJIET.
- **Webcraft Workshop:** Certificate of Appreciation, CONVERGENCE 2K25, VNRVJIET.
